VFF – experience that pays

Founded in 1967, ongoing innovation and the highest possible standards of quality have allowed VFF to develop into Europe's largest producer of tower packings and inert balls. VFF has now become a globally operating company with more than 30 representations.

VFF supplies a full range of tower packings, inert balls (catalyst support material), column internals, plastic packings and droplet separators (demisters), software and consulting for mass and heat transfer applications all over the world.

VFF offers its customers optimum operational safety with high-quality products Made in Germany and is characterised by innovation, flexibility and performance strengths.

You can also find further information about VFF's products online at www.vff.com

VSP®-V – Advantages at a glance

Top mass transfer performance

High performance tower packing

Simple handling during column filling and emptying

Lowest pressure drop

Our VFF product specialist will be glad to advise you on the advantages for use of VSP®-V in your column!

VSP®-V – Physical properties

Materials: PP, PE, PVDF (further materials upon request)

Name	Nominal size	Specific weight	Specific surface	Void space
	mm	kg / m ³	m ² / m ³	%
VSP®-V	50	47	100	95
